Erfarenhet

Heisenware

Senior Frontend Developer

juli 2024 - Present (3 månader)

Hamburg, Tyskland

I lead the development and maintenance of all graphical interfaces (UI) for the company's proprietary platform, ensuring top-tier design and functionality. In close collaboration with the technical co-founder, I drive the UI/UX strategy to meet the highest standards, aligning both technical and user-centric goals. My role involves spearheading the design and implementation of low-code platforms, emphasizing intuitive user experiences and ease of use. I also leverage tools like Figma for design processes and continuously gather user feedback to refine and enhance the platform's overall performance and usability.

knk Content Management Solutions GmbH

Mid-Level Frontend Developer

mars 2024 - juni 2024 (4 månader)

North Rhine-Westphalia, Germany

As the sole frontend developer, I was responsible for overseeing projects from initiation to customer delivery. I collaborated closely with backend colleagues to integrate frontend and backend functionalities seamlessly. Throughout the development process, I maintained a user-centric approach, considering the user's perspective from feature sketching to final testing, ensuring a smooth and intuitive experience.

viind GmbH

Mid-Level Full Stack Developer

augusti 2023 - februari 2024 (7 månader)

Würzburg, Bavaria, Germany

Developed AI-driven chatbot solutions for national city digitization and public services, where I built user interfaces and APIs to support digital transformation efforts. I introduced and implemented end-to-end testing with Cypress to ensure the platform's robustness and reliability. Working within a

Scrum team, I embraced agile methodologies for efficient task management and teamwork, all aimed at achieving project goals. Additionally, I refactored the project to align with best practices, enhancing its overall performance and maintainability.

CHECK24 Vergleichsportal GmbH

Junior Frontend Developer

september 2022 - augusti 2023 (1 år)

Düsseldorf, Nordrhein-Westfalen, Tyskland

Contributed to the development of a new product line for Check24, specifically a sports travel comparison site. In this role, I developed and optimized UI components using Next.js, SCSS, and TypeScript, while collaborating with the product team to deliver responsive, cross-device features. I also created API contracts with mock data to streamline backend and frontend integration, ensuring seamless communication between both sides. To maintain high standards of quality, I implemented end-to-end and visual regression testing using Playwright.

INK99DE

Tattoo Artist

januari 2020 - december 2021 (2 år)

Oberhausen, North Rhine-Westphalia, Germany

As the founder of INK99DE, I focused on transforming ideas into art through fineline tattoos, always prioritizing my clients' happiness. I made it my mission to deeply understand each client's vision and goals, working closely with them to ensure their satisfaction. Every design was meticulously crafted on my iPad, refined until my clients were thrilled with their new tattoo.

All the products I used were vegan and eco-friendly, reflecting my commitment to both hygiene and safety. This approach ensured that every tattoo was not only beautiful but also created with respect for both the client and the environment.

My professional skills are supported by certifications from two major tattoo studios, underscoring my dedication to the craft. I maintained the highest standards of cleanliness and safety, fostering an environment where clients felt secure, cared for, and confident throughout the process.

INK99DE was more than just a tattoo studio. It was a space where art, customer satisfaction, and eco-friendly practices seamlessly came together.
